ADVANCES IN MEDICAL DISCOURSE ANALYSIS

Linguistics Insight - Studies in Language and Communication N° 45 (LI45). Edited by Maurizio Gotti and Françoise Salager-Meyer. The focus of this volume is on medical discourse, a domain of language which deserves closer scrutiny by academics as well as practitioners, due to its increasing relevance and pervasiveness in modern society. Despite the wealth of publications dealing with specialized or academic discourse and its rhetoric, few of these are devoted specifically to medical discourse. This book seeks to redress the balance by bringing together a number of studies that bear witness to the widespread interest in medical texts shown by linguists and professional communities around the world. 2006. Peter Lang AG. ISBN 978-3-03911-185-5.

INDETERMINACY IN TERMINOLOGY AND LSP

Terminology and Lexicography Research and Practice 8 (TLRP 8).

Edited by Bassey Edem Antia.

Studies in honour of Heribert Picht This book deals with the oft-neglected tensions between perspicuity and fuzziness in specialised communication. It describes the manifestations, functions and implications of indeterminacy phenomena in a range of LSP specialisations where it has been customary to expect precision and consistency. 2007. John Benjamins B.V. ISBN 978-90-272-2332-6
